

Bag Information

Bag Size	Ton/Bag 65% Alfalfa	Tons/Bag 35% Earlage	Tons/Bag 28-30% Shelled Corn	Approx Bushels Per Bag (Based on 56# Bushel
8' x 100'	80-90	70	80	---
8' x 150'	120-140	120	130	3,825
8' x 200'	170-190	164	180	5,294
9' x 135'	140-160	134	150	4,411
9' x 150'	160-180	162	175	6,125
9' x 200'	200-225	205	230	6,765
10' x 150'	200-220	180	202	5,940
10' x 200'	270-300	247	278	8,175
10' x 250'	340-360	324	350	12,250

NOTE: The tons per bag are approximate and will vary based on moisture and length of chop and crop types. High moisture shelled corn totals are figured from bagging with a regular Ag-Bag machine. If using an Ag-Bag Grain Bagger, totals will be approximately 20% less, due to density. Also when using the Master Seal sealing strip you can get approximately 2-4 more loads in the bag, depending on the size of the bag.

Suggested Feed out Rates per Day

Winter Rates October – April			Summer Rates May – September		
Bag Size	Feet/Day	Tons/Day	Bag Size	Feet/Day	Tons/Day
8'	1'	1	8'	2	2
9'	1'	1	8'	2-1/4	2-3/4
10'	2'	3	8'	2-1/2	4

Capacity of Tons per Running Foot of Bag

- 8' – 1Ton (approximate)
- 9' – 1-1/4 Ton (approximate)
- 10' – 1-1/2 Ton (approximate)
